HYDERABAD

The venue chosen for this event is Hyderabad, Capital of Andhra Pradesh. Royal, rustic and romantic are just a few terms to describe Hyderabad, but one has to be present here to truly experience the exotic enchantment of this historic city. The vibrant rainbow of cultures and potpourri of faiths is unique and glorious. It is rich in history, arts, architecture and culture. Like the Kohinoor diamond which was mined at the Mines of Golconda, the city is multi-faceted and a shining example of valued traditions. More than 400 years of history is preserved and exists along with the ultra modern infrastructure.

Known as the City of Pearls, it is now globally famous as an IT hub. There are many sites to see including the Ramoji Film City, which is located about 35 kilometers from the Hyderabad city. A tour to the Ramoji Film Studio will tell you why it is acknowledged by the Guinness Book of World Records as one of the largest film studios in the world. You can also see the Charminar, which Muhammad Quli Qutb Shah built in 1591 shortly after he shifted his capital from Golconda to what is now known as Hyderabad. Legend has it that the building honors a promise Quli Qutb Shah made to Allah.

Ramoji - The world's largest integrated film studio complex on over 2000 acres of land.

SESSIONS INCLUDE:

Cardiology, dentistry, dermatology, emergency medicine, endocrinology and liver disease, field procedures, infectious diseases, lameness diagnostics and therapeutics including a live horse ultrasound demo (Denoix) and case discussions (Dyson), neurology, minimally invasive surgery, ophthalmology, orthopedics, performance horse, podiatry, reproduction, upper and lower airway diseases, urinary... *and more!*

There will also be a special Welfare Track with speakers from the Donkey Sanctuary, SPANA, The BROOKE and AAEP.

In order to increase the CE opportunities for our Indian colleagues, 2 days of Small Animal Sessions will be included and presented concurrently with the Equine Sessions. The Keynote Speaker and Scientific Program Chair for the Small Animal Sessions is Dr. Charles Kuntz.
